PROFILE

To leverage my six month of experience as a frontend developer (Designing in Reactjs) to contribute effectively to a dynamic team, while continuously enhancing my skills in a collaborative and innovative environment.

WORK EXPERIENCE

2024 - PRESENT

T-344 Shreeinfinity Infotech, ABC-1,Mota Varachha

Front-end Developer - 6 mounth

- A front-end developer is a software developer who designs and creates the user interface (UI) and user experience (UX) of websites and web applications. They are responsible for the visual elements of a web page, such as fonts, menus, and graphics, and ensure they are functional and presented in a user-friendly way.

EXTRA QUALIFICATION

I have successfully completed a Full Stack Web Development course at Creative Institute. My proficiency extends to both front-end and back- end development. I have mastered React.js for front-end development, while for back-end development , I am now wellequipped with the skills and knowledge necessary to contribute effectively to professional projects in the field of web development.
